X86 Colocation Services

Protect your IT infrastructure business. X86 colocation services help you safeguard mission-critical data with the highest levels of security and operational reliability.

X86 Colocation Solutions

Racks - We configure racking solutions that maximise energy and cooling efficiency. You may select from our standard options (42U) or customised racks, depending on your needs.

Highly Reliable Connectivity Options

At X86, we offer impeccable access. With the high capacity, highly reliable and low-latency network, we will help you connect to the world through our own network. Enjoy a direct access to Domestic & International Carrier to further safeguard your network requirement. You can be 100% sure of a dynamic ecosystem of domestic and global business partners, networks, and carriers.

- Home to Malaysia Internet Exchange (MyIX) nodes.
- Option to have multiple connectivity from multiple service provider and carrier.
- Multiple 10G direct peering with Malaysia Internet Exchange (MyIX).

Our Colocation Points of Presence
